

14

Glass is poured into a hemispherical mold. As the glass cools, a meniscus shape forms on the open face of the piece. Two of these pieces are joined to form an articulated sphere, with the two voids in the middle yielding a certain optical quality. A cylindrical void passes through both hemispheres and houses a light source.

14 Series

Lamping

1w LED or 10w xenon

Material

cast glass, blown borosilicate glass, electrical components

Registration

® 14 Series product design protected as U.S.
