

44

Each 44 results from a free pour of molten aluminum into a large canister filled with rock-like modules of resin-impregnated sand, a waste product of conventional sand casting. Low voltage electricity is transmitted through the castings, allowing a light source to be suspended between them without using cables.

**Lamping**

1w LED

**Material**

Cast aluminum, braided metal coaxial cable,  
aircraft cable, electrical components, white  
powder coated canopy

**Weight**

Min. weight of 1 pendant = 2kg  
Max weight of 1 pendant = 4.5kg  
One lamp assembly = 1kg

**Patent**

US Patent # D776856  
EU Patent # 002840975-0001-0003
